SIMPLIFYING
SMART HOMES

WHY HOME AUTOMATION?

Amidst this fast pace of life, we want everything to be simple, convenient, connected and smart, including our homes.

Imagine coming to a home where, things have been taken care of, your lights dimmed perfectly, your AC cooling at the right temperature, your curtains drawn and your TV set to your favorite channel.
Sounds like a good idea, doesn't it?

CONTROL

Control your home devices with just a tap on your phone screen. Schedule your devices to operate at your desired time, set scenes and mood lightnings to suit a particular occasion or event.

EXPERIENCE

Have your entire Smart Home on one single app. Control through touch, voice, gestures and even integrate sensors to elevate your smart home experience.

MONITOR

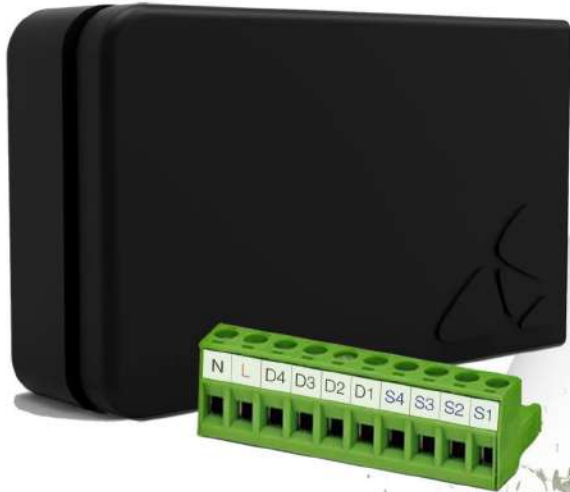

With an integrated artificial intelligence system that comes along with your smart home, know if your devices are on when you are away, the ones that consume most electricity, and the ones that need replacement/servicing. Keep an eye on your home through your smartphone.

| Previous Meter | KWH | KWH | KWH | KWH |

MEET YOUR
SMART ASSISTANT

PICOSTONE

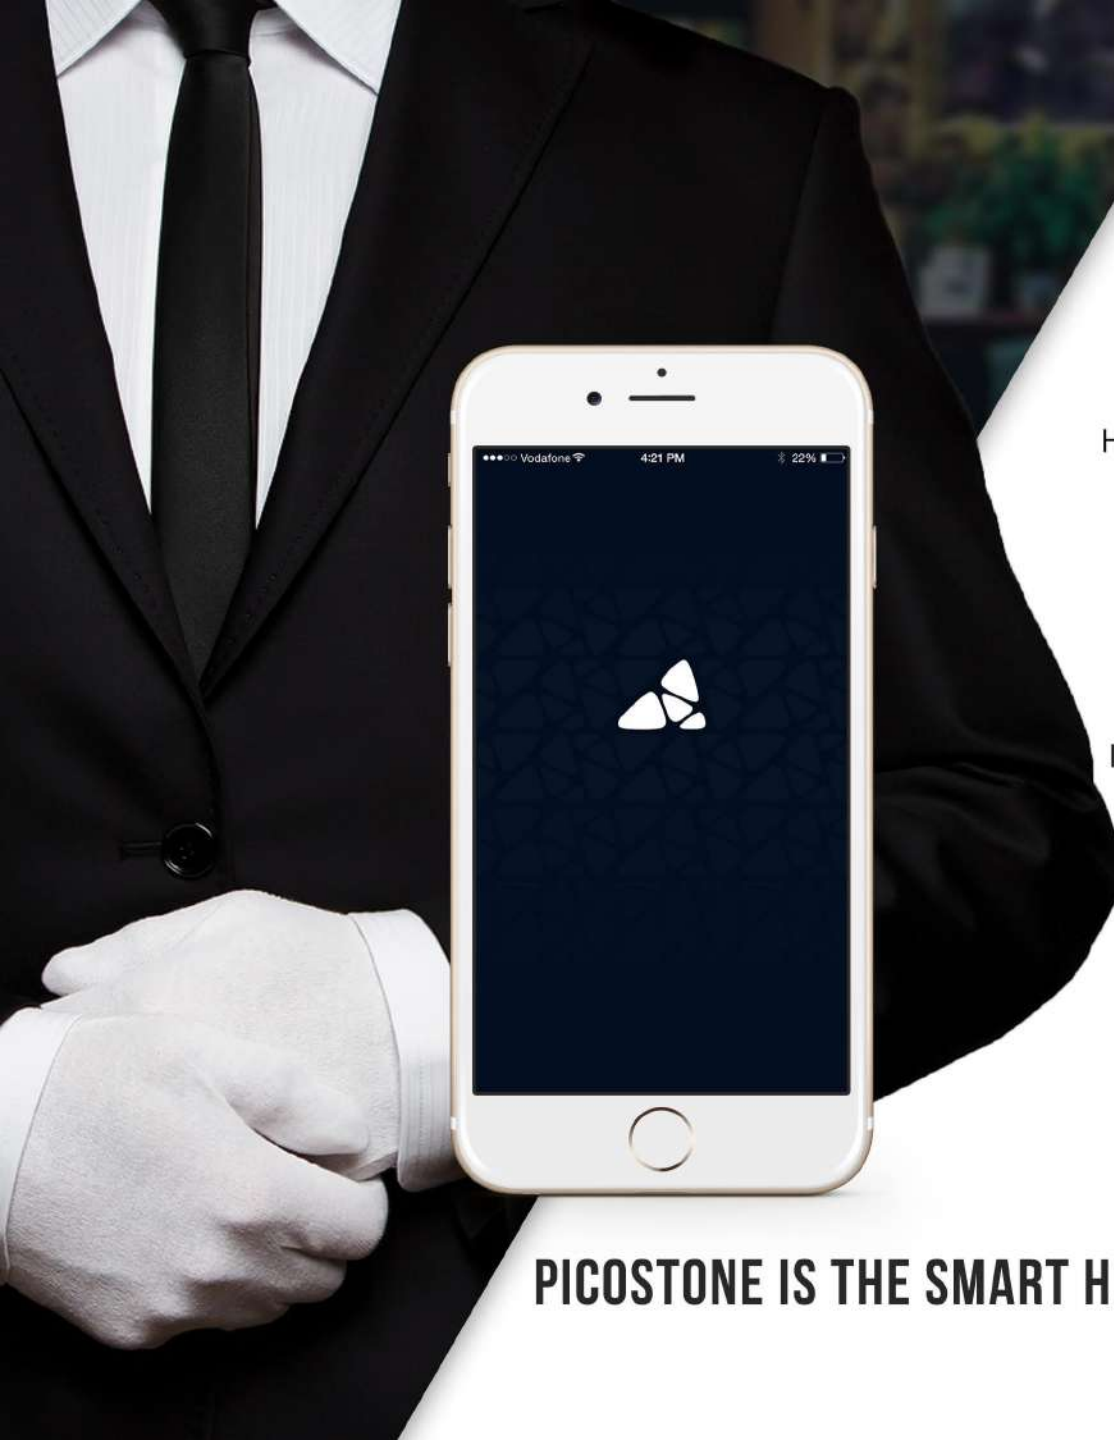

Have the liberty of having your very own Butler-like app, that does all the device management at your command.

Integrated with an advanced Artificial Intelligence, the app, learns your daily routine and suggests you ways to automate it.

It also informs you about any unwanted use of your devices, alerts you if any of your device is consuming more than the required amount of electricity, schedules your devices for you, creates mood lightnings and scenes of your desire, and a lot more...

Integrated with Smart Assistants like **Google Home and Alexa**, Picostone devices also respond and **work with your voice.**

PICOSTONE IS THE SMART HOME ASSISTANT YOU DESERVE

EXPERIENCE AUTOMATION LIKE NEVER BEFORE
