## MULTI-POINT SMART DOOR LOCK

In the times like now, where our lifestyle is leaping towards a digital transformation, Smart Door Lock becomes an extension to your secured living.

Ultraloq **UL300** is a revolutionary smart lock that offers entry via biometric fingerprint identification, contactless key fob, code or your Bluetooth enabled smartphone. With multiple locking mechanisms and 6 ways to unlock, it brings security and simplicity together. The Bridge upgrade allows you to share a temporary eKey or code with guests while you're away from your home and monitor all activity via the iOS or Android app.

This is Best-in-value, Wire-less, Smart Door Lock available today.

## MULTI-POINT SMART DOOR LOCK

### Two-Factor Authentication

After you use a code or key fob, you are requested to input a second security measure -e.g. your fingerprint for an extra layer of security.

### Share Temporary Codes, Not Keys

Simply create a temporary code for your Airbnb guests on the lock or via smartphone app. The code will automatically expire.

### Up to 1 Year of Battery Life

Thank to Bluetooth 4.0's ultra low power consumption technology, UltraLoq can be powered by AA batteries with up to one year of battery life through regular use. Low battery alerts on the lock and smartphone app.

Batteries ran out? No worries!

You have a mechanical key hole positioned on the bottom together with one Micro USB interface for any power bank.

### Secure Multi-Point Lock

A strong stainless steel construction with multiple locking mechanisms that provide higher level of security and protection.
